

Strilube® 7104 is an advanced co-emulsifier derived from fatty acids, meticulously engineered with an optimized molecular architecture. This carefully tailored structure makes it particularly well-suited for chemical derivatization, facilitating the development of high-performance specialty additives designed to meet specific and demanding application requirements.

**Key features:**

-  Good defoaming properties.
-  Excellent co-emulsifier.
-  Improves lubricity.

**Physio-chemical properties**

Tests	Test Method	Results
Appearance	Visual	Clear
Colour	Visual	Pale Yellow
Rosin content	-	< 5 %
Acid number	ASTMD-664	180-200 mg KOH/g (typical)

**Packing:** 200 Kg close head drum

**Storage conditions:** Store in a cool, dry place away from any direct source of heat and moisture. Maximum recommended storage temperature: 50°C

**Solubility:** Soluble in petroleum base oils. Emulsifiable in water. However, it is recommended to verify the solubility in the base oils used and the compatibility with other additives.

**Shelf life:** Best if used within 18 months from the date of manufacture.

**Manufactured by:**
